

TRACK 02 · AI RISK MANAGER ·
HACKATHON SUBMISSION

RTO Trust Layer

A defense-only return-risk decision engine for Indian cash-on-delivery e-commerce. Deterministic rules, calibrated $P(\text{RTO})$, and cost-optimal ACCEPT / REVIEW / REJECT verdicts in merchant rupees — with measured precision and recall on held-out test sets, false-positive cost in the decision loop, a tamper-evident audit trail, and a bounded, advisory-only AI copilot.

RTO Trust Layer Team
